Portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience designing and delivering secure, scalable fintech and digital-wallet platforms in .NET and C#. Core engineer on a small, agile team, owning multiple modules end-to-end — from real-time transactions and message queuing (RabbitMQ, Redis) to third-party integrations and Clean Architecture. Proven record of shipping production-grade systems and automating financial workflows across banking, telecom, and value-added services (VAS) domains.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: .NET 8, .NET Framework 4.5, ASP.NET MVC, ASP.NET Web Forms, Open XML SDK, QuestPDF, Telerik Controls

Databases: SQL Server, Oracle, PostgreSQL, MongoDB, Redis

Messaging & Background Jobs: RabbitMQ, Hangfire, Firebase Cloud Messaging (FCM), Twilio, GlobeSMS

DevOps & Tools: Docker, Kubernetes, CI/CD Pipelines, Azure DevOps, Git, GitHub, TFS, IIS, Jira

Architecture & Practices: Clean Architecture, Microservices, REST APIs, gRPC, JWT Authentication, Agile/Scrum

API & Testing Tools: Swagger, Postman, Scalar

PROFESSIONAL EXPERIENCE

Backend Engineer, Cube Holdings Limited

October 2024 – Present

Beirut, Lebanon

- Architected and built the Mojo Digital Wallet from the ground up, owning multiple core modules end-to-end — Transactions, Notifications, User Management, System Management, Global Management, and Third-Party Integrations.
- Integrated and maintained 6+ third-party providers (G2G, Telia, Airhub, SIA Insurance, Ogero, Scheduler), expanding the platform's service coverage.
- Engineered real-time transaction processing and queue management with RabbitMQ, Redis (caching and OTP storage with automatic cleanup), and Hangfire for background job scheduling.
- Secured the platform with JWT-based authentication and authorization.
- Built internal SMS communication via GlobeSMS and integrated Twilio for international messaging outside Lebanon.
- Delivered real-time in-app push notifications using Firebase Cloud Messaging (FCM).
- Applied Clean Architecture to keep the codebase modular, maintainable, and testable across all projects.
- Automated dynamic Excel reporting (Open XML SDK) and bank-style PDF account statements (QuestPDF), eliminating manual report preparation and accelerating turnaround.
- Containerized Redis with Docker for scalable, portable deployments.
- Drove delivery within Agile sprints using Jira and Azure DevOps Boards for planning, tracking, and collaboration.

Environment: .NET 8, C#, SQL Server, Oracle, Redis, RabbitMQ, Hangfire, Docker, Azure DevOps, CI/CD, JWT Authentication, Swagger, Postman, Scalar.

Software Developer, Mobile Technology Tomorrow (MT2) September 2022 – September 2024

Beirut, Lebanon

- Partnered with the Value-Added Services (VAS) team to build and maintain web landing pages serving markets across the Gulf, Africa, and Europe.
- Owned 20+ multi-tenant portals (educational, gaming, and video web applications), leading support, testing, and troubleshooting for each.
- Built and maintained a microservices architecture, running 4–5 microservices per portal.
- Deployed portal releases to production web servers via IIS and validated live functionality post-deployment.
- Defined and executed planned test cases across all development activities to prevent defects.
- Followed a structured QA process to ensure reliable, on-time releases for all required features.
- Analyzed VAS subscription flows and operator integrations to ensure accurate billing and delivery.

Environment: .NET Framework 4.5, C#, ASP.NET MVC, HTML5, CSS3, JavaScript, SQL Server, TFS, Postman.

Junior Software Developer, Allied Engineering Group (AEG) September 2020 – September 2022

Beirut, Lebanon

- Developed features for fintech products deployed in production banking environments.
- Built desktop applications and Windows services in C#.
- Tested, deployed, and installed web applications via IIS.
- Performed on-site product installations in banking environments, including database scripts and Windows service setup.

Environment: .NET Framework 4.5, C#, ASP.NET Web Forms, HTML5, CSS3, JavaScript, Telerik Controls, SQL Server, TFS.

EDUCATION

Master's Degree (M1), Management Information Systems (MIS)

2020 – 2021

Lebanese University, Beirut

Advanced coursework in Business Computing.

Bachelor's Degree, Management Information Systems (MIS)

2015 – 2019

Lebanese University, Beirut

Coursework in programming and web development.

LANGUAGES

Arabic (Native) • English (Professional Working Proficiency)
